FLIPPPI

*Supporting the participation of
migrant families in Flipped Learning*

Eight organisations from all over Europe are cooperating to strengthen the participation of migrant families in their children schooling through Flipped Learning and Family Learning methods by equipping Intercultural Mediators with the necessary skills and resources to support this process.

We are aiming at the development of the following results:

- A **Matrix of Competencies** - A structured set of competencies based on EU standards and methods on Flipped Learning for migrant families through Family Learning.
- An **Online Campus** - A new online educative tool for Intercultural Mediators.
- A **Practical Activities Set** - A practical tool with a series of methods, exercises and activities to be applied by Intercultural Mediators in their daily practice supporting migrant pupils and parents.
