

FLIPPPI

*Supporting the participation of
migrant families in Flipped Learning*

OBJECTIVE:

The FLIPPPI project aims to strengthen the participation of migrant families in Flipped Learning through Family Learning methods by equipping Intercultural Mediators with the necessary skills and resources to support the process.

PARTNERS:

A multi-sectoral partnership of eight organizations experts in Family Learning and Flipped Learning, intercultural mediation, developing ICT-based tools, and supporting migrant families, working together to analyse the main needs that migrant parents and pupils are facing in school contexts.

PROJECT RESULTS:

Excellent news: we are in the final stages of the project, awaiting the results of the piloting phases in order to improve our project results and make them accessible and adapted to the realities on the ground. These deliverables are:

- ◇ A Matrix of Competencies.
- ◇ An Online Campus to train future Intercultural Mediators in school contexts.
- ◇ A Practical Activities Set for Intercultural Mediators to support them in the creation of positive relationships between migrant students, their families and the wider school community.

NEWS:

A capacity building meeting between project partners took place in Crete (Greece) during May 2023. These meetings are precious opportunities to put together a meaningful project that can be adapted to the realities of several European countries.

Join this enriching dynamic and find out more about the FLIPPPI project by taking part in the **project's final event which will be held in Liège (Belgium) on 11 January 2024**. Stay tuned for more information about this event!
